C. H. KENDRICK & CO. HAVE A NEW CIGAR

Present Wadsworth Brothers' Chico, Which Sells Like Wild Fire.

Kendrick & Co. have recently introduced a new brand of cigars—Wadsworth Brothers' Chico. In size and quality they are the style of a famous cigar, but retail at five cents a pack.
They aim to give the smokers of Barre the best goods possible, and they believe that in pushing and recommending the Chico they have done a good thing for people who like a good cigar at a reasonable price.

The Chico are made from a long clear Havana filler and burn with a mild ash. In flavor and fragrance they cannot be told from cigars that retail at ten and fifteen cents. The fact that they are today the favorite smoke of the most fastidious trade, people who here before smoked nothing but top and fit cigars, shows that this is true. Prove it for yourself, however, by trying a Chico. Put down a dime at their cigar counter and see if the two cigars you get are not better than any cigar you ever smoked before for twice the money.

Nothing Succeeds Like Merit.

This is applicable to The Lorne Elwyn company, supporting Miss Gladys Grey, which begin a three-night engagement at the opera house on Thursday night, May 10th. Mr. Elwyn himself positively appears with this company and Miss Grey, who has become known as the best of the young, pretty actresses of the century, will be seen in all of the leading roles. The plays to be reproduced are only of the very best. The specialties between acts will be a positive novelty even in this age of vaudeville novelties, and will include Davis, the musician, and Emerson and Bolieu, who are too well known to need comment. The company will open with "The Little Minister," "The Singing Girl," "The Girl from the East," "The Girl from the East," "The Girl from the East." The prices will remain the same. Ladies will be given the usual 15-cent complimentary tickets, which, limited to 200, will go on sale at the Red Cross bazaar Tuesday evening at 7:30 o'clock.

Postmaster Robbed.

G. W. Fouts, postmaster at River-ton, La., nearly lost his life and was robbed of all comfort, according to his letter, which says: "For twenty years I had chronic liver complaint, which led to such a severe case of jaundice that even my finger nails turned yellow, when my doctor prescribed Elwyn's Bitters, which cured me and have kept me well for eleven years." Sure cure for biliousness, neuralgia, weakness and all stomach, liver, kidney and bladder derangements. A wonderful tonic. At the Red Cross Pharmacy. 50 cents.

Cold Water For Sprained Wrist.
A simple and efficacious remedy for a sprained wrist is to let water run up on it every morning for some minutes. Holding the wrist as low beneath the mouth of the tap as possible, so that the water may have a good fall. After this has been done bandage it tightly, letting the bandage remain until the next abolition. The sprain will be reduced in a few days.

The New Moon.

The new moon coming between 2 and 4 p. m. means changeable weather in summer and in winter fair and pleasant weather.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, it requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Thoroughly destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that fails to cure. Send for list of testimonials.

POPULAR COS LETTUCE.

Paris White is Best For Either Private or Market Garden.

Paris White is a typical cos variety, strictly self closing, extremely large in comparison with either the butter or crisp sorts—large even for this group—late in season and slow to shoot to seed; plant fairly compact, decidedly upright; color very dark green, never spotted nor brownish in any part; quality excellent, very hard in texture.

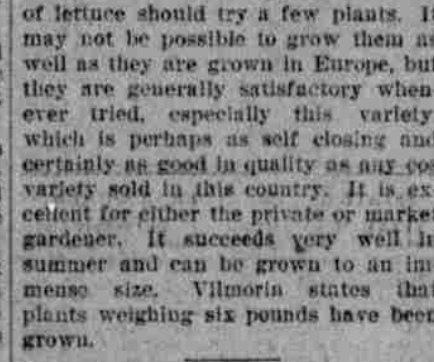

PARIS WHITE COS LETTUCE.

but exceedingly crisp, sweet and of a quality and decided firmness which make a pleasant change from the soft buttered lettuce.

Paris White cos lettuce is one of the popular varieties of the United States. Varieties of this class are very largely grown in Europe, but in America these lettuce do not seem to succeed as well as the butter and crisp varieties and are not much grown. Many consider them the best of all in quality. They are hard and coarse in texture, but possess a sweetness, freshness and distinct quality which are often much liked.

Those who have never grown this class of lettuce should try a few plants. It may not be possible to grow them as well as they are grown in Europe, but they are generally satisfactory when ever tried, especially this variety, which is perhaps as self closing and certainly as good in quality as any cos variety sold in this country. It is excellent for either the private or market gardener. It succeeds very well in summer and can be grown to an immense size. Vilmorin states that plants weighing six pounds have been grown.

How Roads Are Kept Up.
The funds used in the construction and repair of roads in the state of Washington are derived from two sources—a property tax and a poll tax. The property tax is levied by the boards of county commissioners and consists of:

A general road and bridge tax of not more than 4 mills on the dollar on all the taxable property in the county.

A road district tax of not more than 10 mills on the dollar on all the taxable property in the road districts outside the limits of incorporated cities or towns.

Who Gets the Most Out of Life?

Not the wealthiest, not the most learned, nor the idler—but the man who has good health and works for his living. This truth is true, but not trivial.

Every man should guard his health as his most valuable possession. The more so because health is easier to retain than regain.

Keep your grip on health by regular exercise, reasonable care in eating and requisite sleep. Take Beecham's Pills occasionally, to tone the stomach and keep the liver and bowels in good working order. And don't worry.

Observe these simple rules and you will agree that the one who gets the most from life is

Tomatoes on Clover Sod.
A much worse selection of soil could be made for tomatoes than clover sod. With some additions of animal fertilizers, ashes, potash salts, fish, acid phosphate, etc., a good crop should be grown. Cutworms may trouble the plants when first set. To kill these worms the best way is to scatter pieces of green sod, the grass side sprayed with a Paris green solution here and there over the field to be planted. A paper collar placed around the stem at time of setting the plants, with lower edge entering in the ground, will keep the marauders off.

POPULAR GARDENING

Don't you think it would pay you to plant more early potatoes in the garden this time? You may have to make the garden a little larger. All right. There is nice money and a lot of it in early potatoes, remarks an exchange.

The Early Planted Peas.
The early planted peas almost invariably do the best. Get them into the ground just as soon as you can have the soil in shape to receive them.

A Garden Staple.
Cabbage is grown by the dozen in amateur gardens and by ten thousands in market gardens. Since it responds so readily to right treatment it is entitled to all the space, care and attention given it. The soil most suitable for the cabbage is a heavy sandy loam, with a rich dressing of well decayed stable manure plowed in deeply and thoroughly harrowed. Mark off the ground into rows two feet apart one way and sixteen inches the other. At each intersection scatter a little concentrated fertilizer and set the plants deep, nearly to the first leaf, firming the ground well around the roots. Cultivate thoroughly and frequently and hoe deeply.

Small Early Table Beets.
Seed can now be sown in open ground and for succession every few weeks. For the small early table beets the rows may be made one foot apart and the plants be thinned to stand three or four inches apart in the rows.

Onions for Home Garden.
Onions for the home garden should be raised partly from seed and partly from sets or transplanting. The small onions picked off from one season's crop may be used as sets the next year, when they will give a much earlier crop than those from seed. The same ground that grows onions may sometimes be used to grow cucumbers or melons at the same time, since onions do not shade the land much or take much nourishment from it except early in the spring.
